The Apollo Player Piano is the only one in the world permitted to play directly on the keps. The principle, in its application to player pianos, is patented and owned by Melville Clark. VITALITY OF EGGS.

Miss Wisegirl-And, Jane-after German Bird Fancier Makes Some lateresting Tests,

> A German bird fancler has made series of experiments for the purse of determining the vitality of eggs ia different stages of incubation. On the fifth day of incubation tive cansry bird's eggs were taken from the nest, marked with numbers and replaced in the nest, one by one, at half-hour Intervala. This experiatent was repeated ten times, with as namy lutches of eggs. As a rule, says the Scientific American, the first three ggs replaced hatched normally and the two others falled to hatch, Hence it may be laferred that the average longevity of a canary bird's ggs, taken from the nest on the fifth day of incubation, is one and a half hours.
